# How to append vendor specific IE in driver management frames

2015/12/24

## Introduction

This document can teach user, how to append vendor specific IE in Realtek driver management frames by iwpriv (rtwpriv) command.

Please follow those steps to set vendor ie setting.

## **Driver setting.**

 Please enable append vendor ie feature from Makefile CONFIG APPEND VENDOR IE ENABLE = n ==>

CONFIG\_APPEND\_VENDOR\_IE\_ENABLE = y

## Step.

1. Insert Realtek driver

Ex: insmod 8821au.ko

- 2. Up interface
  - Ex: ifconfig wlan0 up
- 3. Use iwpriv tools (or rtwpriv tools) and command "vendor\_ie\_set" to set vendor ie Ex: iwpriv wlan0 vendor\_ie\_set
  - 0,5,dd3300e04c0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef
- 4. Can use iwpriv tools (or rtwpriv tools) and command "vendor\_ie\_get" to get vendor ie setting
- 5. Run hostapd or wpa\_supplicant

Note: If want to change vendor IE , after setting , must restart hostapd or wpa\_supplicant.

# **Command usage**

## 1. vendor\_ie\_set:

```
iwpriv [interface_name] vendor_ie_set [vendor_ie_number],[vendor_ie_mask],[vendor_ie_context]
                               interface_name: wifi interface name (ex: wlan0)
                              vendor_ie_number: want to append vender ie number, can support number 0~4, totals 5 groups vendor ie.
                               vendor_ie_mask: which management frame want to add vendor ie.
                                                             Bit(0) beacon
                                                             Bit(1) probe request
                                                             Bit(2) probe response
                                                             Bit(3) association request
                                                             Bit(4) association response
ex: If you want to add vendor ie to beacon and probe response, vendor_ie_mask will be set "5", (5 = binary 0000
0101)
                              vendor_ie_context: Full vendor ie Hexadecimal context.
                              ex: [Element ID][Length][OUI][Value]
dd3300e04c0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef01

                                                                        Value:
                                                                                                                                                                                                                        (48 bytes) [210-257]
                                                                                                                                                                                                              FCS=0xB6DD9729
Setting example: To set group 0 or group 3
iwpriv wlan0 vendor_ie_set
0, 5, dd3300e04c0123456789 abcdef0123456789 abcdef012345678 abc
0123456789abcdef
```

or

 $iwpriv\ wlan0\ vendor\_ie\_set$ 

3, 3, dd 3300 e 04 c 0123456789 abc def 012345678

0123456789abcdef

#### 2. vendor\_ie\_get:

#### iwpriv [interface\_name] vendor\_ie\_get [vendor\_ie\_number]

interface\_name: wifi interface name

 $vendor\_ie\_number: want check appended vender ie number , can support number 0~4 , totals 5 groups \\ vendor ie.$ 

ex: To get group 0 setting or get group 3 setting

#### $iwpriv\ wlan0\ vendor\_ie\_get\ 0$

wlan0 vendor\_ie\_get:

Vendor IE num 0, Mask:5 [Beacon][Probe Resp]

Vendor IE:

56789abcdef

or

#### iwpriv wlan0 vendor\_ie\_get 3

wlan0 vendor\_ie\_get:

Vendor IE num 3, Mask:3 [Beacon][Probe Req]

Vendor IE:

dd3300e04c0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef01

56789abcdef

### 3. Clear vendor ie setting:

ex: To clear vendor ie number 1 group

iwpriv wlan0 vendor\_ie\_set 1,0,0

Can use vendor\_ie\_get to check

#### iwpriv wlan0 vendor\_ie\_get 0

wlan0 vendor\_ie\_get:

Vendor IE num 0, Mask:0

Vendor IE:
